Progress Note

Client reports a difficult week after a disagreement with a coworker; mood was low for two days and then recovered. We used the session to rehearse the conversation client wants to have with the coworker and to name the automatic thoughts that came up. Client identified three and offered a balanced alternative for each. Appetite and sleep are unchanged from last week. Plan: continue weekly sessions and repeat the GAD-7 at the next visit. No suicidal ideation, self-harm or violence reported.
